## NGOSS/OSS/BSS

NGOSS/OSS/BSS – NextGen Operational and Business Support Systems solutions enable telecom service providers to automate the provision of services, monitor and manage the core network infrastructure as well as quality of the services they deliver to the customers. We at Database Link provide a core set of OSS systems implementation and development tasks related to:

- End-to-end Service Assurance
- Telecom Management Network
- Service Level Management and QoS Management
- IT Service Management
- Network, Systems, and Applications Management
- Automated Service Activation & Provisioning Control
- Service Activation for NextGen IP Services (Triple Play, VPN over IP MPLS, etc.)
- Network & Service Inventory for NextGen IP Services

## Expertise

- OSS Implementation (NetExpert OSI, NetCracker, Naumen, XML, SOAP, etc.)
- OSS Data Migration (Oracle, MS SQL, MetaSolv, XML, spreadsheets, etc.)
- Network Inventory Design
- Telecom Business Data Analysis
- OSS Object-Relational Data Modeling
- Target Database Development (PL/SQL)

## Commerce

- NGOSS Solutions Evaluation and International Distribution
- Enterprise Application Integration (EAI)
- Telecom and Related Software Marketing

## Vision

- Emerging NGOSS/OSS/BSS technologies advancement
